PROFESSIONAL SUMMARY

Computer Science Engineering undergraduate focused on AI-powered applications, full-stack development, and automation systems. Built projects including AI voice assistants, recommendation systems, and scalable web platforms using Python, React.js, Django, Node.js, PostgreSQL, and REST APIs. Strong foundation in problem solving, backend development, and cloud fundamentals.

EDUCATION

Koneru Lakshmaiah Education Foundation

Bachelor of Technology in Computer Science Engineering — CGPA: 8.69

2024 – 2028

Hyderabad, India

PROJECTS

NOVA AI | Python, Tkinter, JSON, Speech Recognition

- Built a desktop AI voice assistant for automation and smart command execution.
- Implemented speech recognition and JSON-based command workflows.
- [GitHub Repository](#)

FeedingUs | React.js, Node.js, MongoDB

- Developed a food donation platform connecting restaurants with NGOs and food banks.
- Integrated responsive frontend interfaces and backend APIs for donation management.
- [Live Demo](#) | [GitHub Repository](#)

EkoSoul | Python, NLP, Sentiment Analysis

- Created an AI-based music recommendation system using emotion and sentiment analysis.
- Generated personalized recommendations based on user mood.
- [GitHub Repository](#)

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Frontend: HTML, CSS, React.js

Backend: Django, Node.js, REST APIs

Databases: PostgreSQL, MySQL, MongoDB

AI & Cloud: Generative AI, NLP, AWS Fundamentals

Tools: Git, GitHub, Linux, VS Code

Core CS: DSA, OOP, DBMS, Operating Systems

CERTIFICATIONS

- AWS Certified Cloud Practitioner
- Generative AI Mastermind – Outskill
- Frontend Development using React – Coursera
- Python Programming – Coursera
- Getting Started with Git and GitHub – IBM

ACHIEVEMENTS

- Solved 150+ DSA problems across coding platforms.
- Built multiple AI and full-stack projects independently.
